TIME TESTED... A GAME CHANGER!

THE GATOR BASE ADVANTAGES

- Gator Base is made of durable engineered material and will last forever
- Jobs are completed 20% faster than the traditional way
- Reduces needless excavation
- Reduces the effects of freeze and thaw cycles
- Less destruction on property during installation phase
- The perfect product for easy or hard-to-access areas
- Equivalent to a traditional granular base under dynamic loads

WHAT IS GATOR BASE?

- Manufactured using lightweight high-density polypropylene
- Has an R-Value of 3.6 which acts as a thermal blanket
- Is extremely durable and will not degrade in the ground
- Equivalent to 288 lb (130 kg) of crushed stone
- Designed with a tongue and groove system LOCK-N-GO
- Replaces 6" (15 cm) of compacted crushed stone
- Evacuates water through the channel and holes
- **Designed for pedestrian applications only**

IDEAL FOR:

- Pedestrian applications
- Patios, Pool decks, Pathways
- Seat walls, Fire pits applications
- Can be applied with heated paving system up to 122 °F (50 °C)
- Gator Tile System

The Gator Base with its interlocked paneling system, distributes dynamic loads to a very wide area practically eliminating any pressure on the ground.

DIMENSIONS: 24" X 36" (60 CM X 90 CM)

GATOR GRID PLACEMENT DISCLAIMER

The soil composition may vary from location to location. Global stability of the soil has not been considered. It is the owner's responsibility to take into consideration the soil parameters indicated on the label and to ensure that the soil's properties meet construction standards. A soil analysis must be done before starting any wall project. Before the construction of your segmental wall and before using any type of Gator Grid and establishing the placement, consult a qualified local engineer and obtain a stamped plan. To ensure the structural integrity of your segmental retaining wall, follow manufacturer instructions and installation steps for the construction of your wall. These placement tables are not to be used on multi-tiered walls or in areas with excess water runoff, seepage or springs, unless first otherwise confirmed by a qualified local engineer. Additional Gator Grid than what appears on the label may be required in your application. This document should not be construed as engineering advice. We assume no liability of any kind if the instructions in the present disclaimer are not followed or if the owner's use of the product is different than the one for which it is intended.
